PROFESSIONAL SUMMARY

Motivated Computer Science graduate student (MCA, 2026 Batch) with hands-on experience in AI/ML, data analytics, automation, and software development. Proficient in Python, Java, SQL, and industry-standard development tools. Skilled in building machine learning pipelines, data dashboards, and automation workflows. Strong foundation in Data Structures & Algorithms, OOP, and SDLC practices. Seeking to contribute as a Specialist Programmer, leveraging technical expertise and a passion for engineering innovation.

TECHNICAL SKILLS

Programming & Databases: Python, Java, MySQL

Tools: Git, GitHub, VS Code, Power BI, XAMPP, CI/CD pipelines

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Computer Networks, Database Management System

Data & BI Technologies: Power BI, Data Modeling, Power Query, DAX

DevOps & Engineering Tools: GitHub, Azure DevOps, CI/CD pipeline basics, Automation scripting using Python

KEY TECHNICAL EXPERIENCE

- Developed an AI-based emotion recognition system using machine learning for facial emotion analysis, improving privacy protection against multiple adversarial attack scenarios.
- Applied AI-driven insights in Power BI dashboard development to enhance data interpretation and support data-driven decision-making for sustainability metrics.

PROJECTS

Resumeiq-JD Matcher | AI Project

Working

- Built a RAG-powered resume screening system using OpenAI embeddings, Pinecone vector search, and GPT — enabling semantic matching of candidate PDFs to job descriptions with LLM-generated match reasoning.

Security on Facial Emotion Analysis | AI/ML Project

2024–2025

- GitHub: [Security On Facial Emotion Analysis](#)
- Built an emotion recognition model using ML techniques to protect facial data privacy against multiple attack scenarios (adversarial, inference, and reconstruction attacks).
- Collaborated in an Agile team of 4, maintaining weekly sprint reporting, documentation, and peer code reviews.
- Strengthened skills in Python, model evaluation, and cross-functional communication within a structured SDLC framework.

Sustainability & Carbon Footprint Dashboard | Power BI Project

2024–2025

- GitHub: [Sustainability & Carbon Footprint Dashboard](#)
- Designed and deployed an interactive Power BI dashboard tracking CO₂ emissions, renewable energy usage, recycling impact, and cost savings for organizational sustainability reporting.
- Integrated AI-driven analytical models to surface insights and highlight emission reduction opportunities.
- Demonstrated strong data visualization and storytelling skills, with expertise in Power BI and cloud analytics tools aligned with enterprise data ecosystems.

GA-Based Feature Selection for Phishing Email Detection | ML Project

2024

- GitHub: [GA-Based Feature Selection for Phishing Email Detection](#)
- Built a locally-executable phishing detection system using Genetic Algorithm (GA) for feature selection, addressing the gap in offline email security tools.

- Improved classification accuracy by selecting the most relevant email text and header features while reducing noise and model overfitting.
- Applied automation techniques to streamline feature evaluation across multiple GA generations.

Online Table Reservation System | Full-Stack Project

2023

- GitHub: [Online Table Reservation System](#)
- Developed and deployed a real-time restaurant booking system handling 50+ reservations per day with a 30% reduction in booking errors.
- Used PHP for backend logic and MySQL for secure database management, achieving 99.9% system uptime.

INDUSTRIAL TRAINING & INTERNSHIPS

Microsoft Power BI using AI/ML | Euphoria GenX — Industrial Training

May 2025 – Aug 2025

- Completed intensive training on Microsoft Power BI integrated with AI/ML capabilities, building real-world dashboards and analytical reports.
- Gained practical experience in data transformation, DAX measures, and AI visual features within Power BI, applicable to enterprise analytics and business intelligence workflows.

EDUCATION

Master of Computer Applications (MCA) | Institute of Engineering & Management, Kolkata

2024 – Present

CGPA: 80.9% (up to 3rd Semester) | Specialization: AI, Data Science & Cloud Computing

Bachelor of Computer Applications (BCA) | Sarada Ma Girls' College, Barasat

2024

Percentage: 71.30%

Higher Secondary | Naihati Narendra Vidyaniketan (HS)

2021

Percentage: 58.2%

Secondary Education | Ramakrishna Vivekananda Mission Vidyabhawan

2019

Percentage: 57.2%

GITHUB PORTFOLIO

[atrimabhata](#)

- 12 Public repositories covering data analytics, ML experiments, and web projects.

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP) Specialization — Coursera (Infosec) | 2026
- Natural Language Processing in Microsoft Azure— Coursera | 2026
- Azure Cloud Services by Microsoft— Coursera | 2026
- Introduction to Cybersecurity Essentials — IBM | 2025
- Introduction to Generative AI — Microsoft | 2025
- Preparing Data for Analysis with Microsoft Excel — Microsoft | 2025
- Computer Literacy in Information Technology — Ramakrishna Mission | 2020

ACHIEVEMENTS & COMPETITIONS

- CODEWAY SURFER 3.0 — Coding Competition, University of Engineering & Management (2025)
- Project Competition, Department of Computer Application — UEM (2025)
- Python Programming — 5-Star Rating on HackerRank
